City state	- A city with its own king who was in complete control over his subjects
Hieroglyphs	- A system of writing which uses pictures to represent words or sounds
Epigraphers	- People who studied hieroglyphs until they understood what they meant

Background Information
<p>The Maya lived in the continent of North America in an area that is referred to Central America. When the Spanish conquistador 'discovered' the Americas and conquered the native people they brought their way of life with them. The area came under the control of the Spanish. This meant that they brought their religion, language and culture with them.</p> <p>The conquistadors thought that the native people were heathen savages who needed to be taught how to live a civilised life. They tried to teach the Maya to abandon their traditions and instead adopt a European culture.</p> <p>Mayan culture was well established by 1000 BCE and lasted until 1697 CE. The lives of the ancient Maya centred around their religion and gods of nature.</p> <p>The Maya people made significant advancements in mathematics and astronomy. The Mayans developed a written language of hieroglyphs</p> <p>Mexico is located in South America over 5000 miles away. The time difference is 6 hours behind the UK.</p> <p>Mexico is famous for its cuisine, ancient temples, glorious coastline and for being the birthplace of chocolate!</p>
